

Immunohistochemical detection systems

Fast Stain product line

3-step polymer HRP detection system

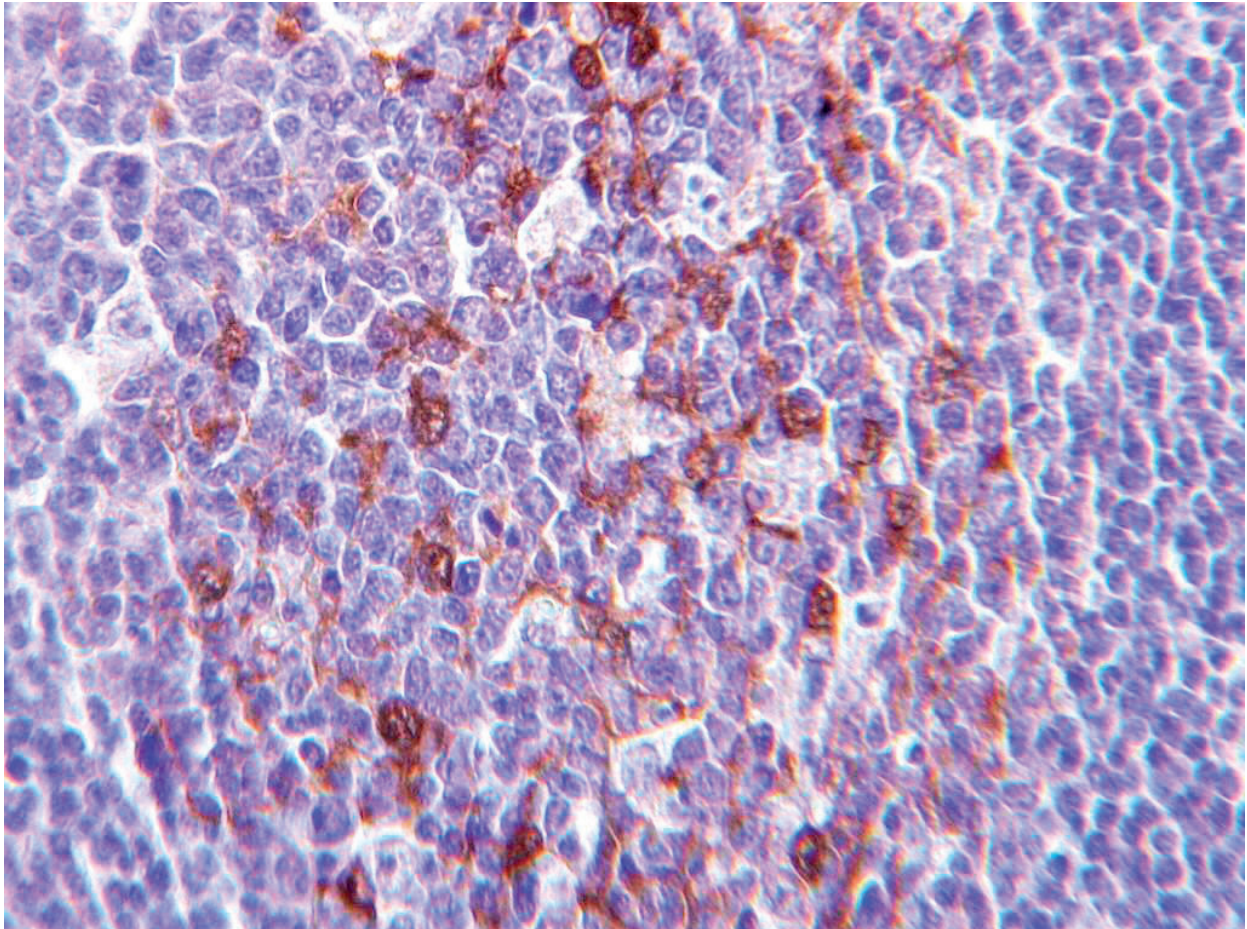

Figure: S 100 # 2190000130 **Staining Procedure:** ABC/HRP w. DAB
Tissue: Tonsil **Catalog number** 300130700

quartett GmbH offers its new immunohistochemical detection 3-step **Fast Stain** kits. Kits are available with polymer Horseradish Peroxidase (HRP) and Alkaline Phosphatase (AP) and AEC, DAB or Fast Red chromogen.

Polyvalent secondary antibody detects Mouse, Rabbit and Goat primary antibodies. Kits can be used on frozen and paraffin-embedded tissue. No change of buffers or antibody diluent necessary. Kits offered with all reagents including corresponding mounting medium.

Immunohistochemical detection systems

Fast Stain product line

3-step polymer HRP detection system

Fast Stain product highlights:

- 3-step procedure
- Decreasing incubation time < 4-7 minutes
- Easy to use
- Manual and automated (on request) staining
- Developed for high through put laboratories
- Increased color intensity
- Improved polymer Horseradish Peroxidase (HRP)

Products:

ABC / HRP Kit w. AEC, FastStain, 150 Tests	300120700
ABC / HRP Kit w. DAB, FastStain, 150 Tests	300130700
ABC / AP Kit w. Fast Red, Fast Stain, 150 Tests	300140700
